

Simple Feature Test Guide

Use photographer account in dashboard. Use Incognito/private window for client tests. Real email tests need SMTP + available monthly email quota.

1. Gallery category

Go: Client Gallery → Galleries → New Gallery

Test: Choose `wedding` → Save → Reopen → category must stay. Choose `Custom label` → type `Newborn` → Save → Reopen → `Newborn` must stay.

Does: Groups galleries by type.

2. Client Emails

Go: Client Gallery → Galleries → Create/Edit Gallery → Client Emails

Test: Add `client@example.com` → Save → Reopen → email must stay.

Does: These people receive **Gallery Published** automation. This is not gallery email-access/login setting. Emails must not appear publicly.

3. Homepage category filters

Go: Client Gallery → Homepage → Show gallery categories

Test: Enable → Save → open public homepage → click `wedding`, `Travel`, `All` → gallery list must filter.

4. Featured galleries

Go: Client Gallery → Homepage → Featured Galleries & Categories

Test: Select published galleries → Save → open public homepage → selected galleries must appear first.

5. Email templates

Go: Client Gallery → Settings → Email Templates

Test: Filter purpose/category/language → open template → edit → Save → Reload → changes must stay.

New template: New Template → add name, subject, message, button → Save → Reload → template must remain editable.

Languages: English, Spanish, French, German, Greek, Arabic. Arabic must display right-to-left.

Important: Template only stores email design/content. It sends nothing until used by campaign or automation.

6. Admin email templates

Go: `/admin/email-templates`

Test: Filter → open template → edit purpose/category/language → Save → Reload → changes must stay.

7. Manual/scheduled email campaign

Go: Client Gallery → Marketing → Email

Test: Create email → choose template + gallery → schedule a few minutes ahead → client must receive it → button must open chosen gallery.

8. Automation email editor

Go: Client Gallery → Marketing → Automations

Test: Create/open automation → Edit email → change subject/message/button → Save automated email → reopen → changes must stay.

Available triggers: New subscriber, Gallery published, Client download, Client favorite.

9. New Subscriber automation

Go: Marketing → Automations → New Automation → New subscriber

Test: Choose template → enable → Incognito public gallery → submit marketing opt-in → email must arrive once.

Receiver: New opted-in subscriber.

10. Gallery Published automation

Go:

Gallery → Draft → add Client Emails → Save

Marketing → Automations → New → Gallery published → enable

Test: Change gallery Draft → Published → Save → Client Emails must receive gallery link.

Receiver: Gallery **Client Emails** + clients previously registered on that gallery.

Important: Saving already-published gallery again must not resend.

11. Client Download automation

Go: Marketing → Automations → New → Client download

Test: Enable → Incognito public gallery → enter client email → download photo/gallery → same client must receive email once.

Receiver: Person who downloaded. Gallery Client Emails list is not used.

Repeat test: Same gallery + same automation + same email must not resend. Use new email to test again.

12. Client Favorite automation

Go: Marketing → Automations → New → Client favorite

Test: Enable → Incognito public gallery → enter client email → favorite photo → same client must receive email once.

Receiver: Person who favorited. Remove/re-add must not resend for same gallery/automation/email.

13. Automation tokens and safety

Use in Gallery Published, Download, or Favorite email:

- `{{galleryName}}` → real gallery name
- `{{clientEmail}}` → receiver email
- `{{event}}` → event name

Test: Add tokens → trigger new event → received email must show real values. Pause automation → new event must send nothing.

14. Animated logo reveal

Go: Gallery → Design → Cover → Motion & Logo Reveal

Test: Enable → choose reveal style/duration → Save → open public gallery in new Incognito window → intro must play.

Also test: Skip intro → gallery opens immediately. Only once per session → refresh → intro does not replay.

15. Cover entrance motion

Go: Gallery → Design → Cover → Motion & Logo Reveal

Test: Try None, Fade in, Slow cinematic zoom, Rise in → Save each → reload public gallery → selected motion must appear.

16. Cover image parallax

Go: Gallery → Design → Cover → Animated Cover Studio → Cover image parallax

Use: Enable it, then set **Parallax strength**. Start around 40-60px for a clearly visible result. This control moves only the **cover image**; cover text and the gallery grid stay independent.

Test: Use an image cover → enable Cover image parallax → scroll the right-side live preview → the cover photo should drift at a slower rate than the page. Save → open the published gallery → scroll down from the cover → the same depth effect must appear.

Also test: Disable it → cover is still. Use a video cover → no cover parallax is applied. Enable reduced-motion in the OS/browser → cover stays still.

17. Gallery image parallax

Go: Gallery → Design → Cover → Animated Cover Studio → Gallery image parallax

Use: Enable it, then set **Parallax strength**. This affects the **gallery photos below the cover**, not the cover image. It can be enabled at the same time as Cover image parallax.

Test: Enable → scroll the right-side live preview through the photo grid → images should move with visible depth inside their tiles. Save → open the published gallery → scroll the gallery → the same effect must appear.

Also test: Disable it → gallery photos are still. Reduced-motion → photos stay still.

18. Homepage trusted-by animation

Go: Public main homepage `/` → Trusted by professionals

Test: Scroll to logos → animation must be smooth, no jump/flicker. Reduced-motion mode → content stays visible without unnecessary motion.

19. Album Designer

Go: Client Gallery → Album Designer

Test: New album → select gallery → choose size/cover → Auto-design → edit spreads → Save → leave/reopen → design must stay → Export album plan.

Does: Photographer designs album from client gallery photos. Client cannot design/approve it. No email, order, or payment connection.

20. Client Blog

Go: Client Gallery → Blog

Test: Create Draft → confirm not public → Publish → open public homepage → post must appear in Journal / Latest Stories.

Public pages: `/home/<site-slug>/blog` and `/home/<site-slug>/blog/<post-slug>` . Configured photographer subdomain also uses `/blog` .

Test search, category, language, Featured post, cover, and article page.

21. Admin Blog

Go: `/admin/blogs`

Test: Create/edit/publish post → open `/blog` → post must appear → open `/blog/<slug>` → detail page must work.

22. Favorite ZIP download

Go: Public gallery → My Favorites

Test: Favorite 3 photos → select only 1 → Download selected → ZIP must contain exactly 1. Select 2 → ZIP must contain exactly 2.

23. Bookings, Events, and Co-workers

Go: Client Gallery → Bookings

URL: `/dashboard/client-gallery/bookings`

Co-workers

Co-workers → Add co-worker → enter name/email/phone/role → Save → Edit → deactivate/delete.

Does: Stores staff and lets photographer assign them to services/events. It does not create staff login or invitation.

Booking types

Booking Types → New booking type → add name/duration/price/currency/location → assign co-worker → enable online booking → Save.

Booking settings

Settings → enable Online booking → set timezone/hours/slot interval/booking window → choose auto-confirm → Save → Copy public link.

Client booking

Open `/book/<username-or-user-id>` in Incognito → choose service/date/time → enter client details → Submit.

Pass: Booking appears in Bookings tab. Owner + client receive email when SMTP works.

Manage booking

Bookings → open request → Confirm → Complete or Cancel → status must update.

Manage event

Calendar → Add event → add title/start/end/location/notes → assign co-worker → Save → event must appear → edit it → Save → changes must stay.

Not included: Event delete button, co-worker login/invite, co-worker notification email, Google Calendar sync, online booking payment.

24. Quick email troubleshooting

No email? Check:

- Automation enabled
- Correct trigger + gallery scope
- SMTP configured
- Monthly email quota available
- New test email used for Download/Favorite repeat test
- Gallery Published has Client Emails
- New Subscriber client opted in

25. Final quick check

Gallery create/edit/upload → public PIN/email access → downloads → favorites → homepage/search → templates after login again → mobile layout. Everything must still work.
